| <b>10/26/2023</b> | Tabling Event with On-Campus Senators                       | Getting feedback directly from students walking down the oval and getting to know more about big, small and all kinds of issues to better serve the student body by finding a solution | Kritiyug Nischal.5                                 |

## General Assembly Constituency Report **1**

for them. Also monitoring general issues outside my consistency and some of the ways on I can improve those by connecting with administrations and doing policy work.

Since being elected to be part of the General Assembly, what have you done to represent the student voice in the chamber and in other relevant circumstances?

Ever since becoming elected as a senator in the "General Assembly", I am closely working with students to ensure that all the issues currently on-going within the residence halls and individually with students must be fixed before the end of the semester if possible or as soon as they can get fixed. I am currently holding the position of "Marketing Chair" in "Barrett-Nosker Community Council" in which I get a ton of feedback from general body members as well as executive body members. Since all of those students are living on-campus and for the executive board are required to live on-campus.

Besides getting feedback comes in the main part of my role which is to serve the students (Finding solutions for those problems). So, I always reach out to the administration who are responsible for that specific type of issue. And try to resolve the issue asap. Now I used the word "try" because THE Ohio State University is a big university. So, the administration also has many other tasks in their hand therefore, it is really hard to push them to do several things on time. Some individuals in the administration are really nice and does most of the things whenever they get time or as soon as possible. But most of them are stacked with work so can't fix some issues which doesn't require too much work on time as well. However, some issues can be big. Like water supply problem in the entire residence building or group of buildings can be long term and despite administration best efforts or immediate efforts takes years to resolve.

But all of time-consuming process is required by the university guidelines and hence can't be amended too often. Other big part of which I would like to focus on is connecting students/residents at THE Ohio State University to other regional institutions students/residence. Which would provide them with an opportunity to network more regionally. One of the ways in which I think I could pursue this connecting with regional and national organizations like "Central Atlantic Affiliate of College and Residence Halls" as well as the "National Association of College and Residence Halls" in order to host events which would provide the opportunity to represent THE Ohio State University regionally and nationally by the students/residents.
