Since being elected to be part of the General Assembly, what have you done to represent the student voice in the chamber and in other relevant circumstances?

There have been more barriers in interactions between my constituency and myself this semester, therefore I have not held any constituency events yet this semester. I plan on reaching out to all the known engineering organizations on campus shortly, in order to gain their feedback, concerns, and potentially sit in on some of their meetings. I also have not created or passed any legislation yet this semester that impacts engineering students specifically, but I am always mindful of how different legislation will impact my constituency as well as the entire student body. I currently serve in General Assembly's Oversight, Health & Safety, and Student Affairs committees and I would love to hear from as many of my constituents as possible going forward.
