General Assembly Constituency Report 1

passing/drafting legislation
involving ranked choice
voting being implemented in
the USG voting process.
Conversation over email and
is still ongoing in the R&D of
this legislation .

Since being elected to be part of the General Assembly, what have you done to represent the student voice in the chamber and in other relevant circumstances?

So far the most important thing I have done to represent my constituents was attending the meeting involving the Engineering Council leadership positions, David Tamasko and Winifred Sampson. During this meeting we discussed the USG Senators getting more involved in the Engineering Council, a direct line to a large portion of engineering students. We set up a date for the Senators to come to an E Council meeting and have an open discussion there directly with students. Also, we talked with Mr. Tamasko, The Dean of the College of Engineering, on future huge changes and our opinion on them. Things regarding how the application process for getting into your engineering major works as well as the multiple fees and possibility of them rising in the near future. Overall a great meeting and a great start to getting in touch directly with our constituents.

In the chamber, I have voted and communicated with my own voice and opinions. I believe I was elected to do so and have not shied away from discussion or advice in the resolutions and elections. With most engineering students that I meet I am very glad to inform them that I am their representative. I want the students to know who I am and how they can contact me with ideas.
