Since being elected to be part of the General Assembly, what have you done to represent the student voice in the chamber and in other relevant circumstances?

Although I have not hosted any events, I contacted Student Health Services about providing free flu vaccines to all undergraduates. The person I contacted said that that would not be economically feasible, so I am looking into alternative methods to increase immunization rates among students. Some options include extending the flu shot clinic hours and advertising for these resources across campus. I've also been in contact with other senators that expressed interest in this resolution.
