VI. Old Business

VII. New Business

- a. 50-R-33: A Resolution to Add Hanging Straps to CABS Buses to Increase Safety of Passengers
 - i. Nadeem: I wanted to write this resolution because I feel like there is a need for more safety on the busses, especially for vertical challenged people like me. When you have to stand on the bus when it is packed, it is vital to be able to hold on something — when you're 4' 11", and the hand bar seems miles away from you, it is very difficult to stand and not fall. would love to pass with unanimous consent and show that short people matter too.

- ii. Quadri: I apologize for missing tonight's general assembly. As a commuter student and frequent user of CABS, there has been several times where there aren't enough seats available so I have to stand and hold onto the railing bars. I believe this resolution will help increase the safety of all passengers, in addition to those who cannot reach the bars. Having hanging straps can help students have better grip during icy and rainy days where the bus floor is wet and slippery. I think the addition of straps is long overdue and recommend this resolution's passage
- iii. Greer: I am also vertically challenged and these hanging straps would be very helpful.
- iv. Malpass: Retweet.
- v. Long: I am also short.
- vi. Munjal: Pass.
- vii. Shire: I agree.
- viii. Humayan: Motion to pass with unanimous consent.

50-R-33 PASSED with unanimous consent.
