Introduction

Thank you for taking the time to read our 2015-2016 Undergraduate Student Government Demographics Report. This document serves to provide transparency and a deeper portal of understanding for the undergraduate student body. We believe students have the right to know how they are being represented and by whom. The following data will provide you with an understanding of the various identities that make up USG. The demographic categories measured were compiled in collaboration with the Center for the Study of Student Life. Please visit our website (usg.osu.edu) to see the initiatives USG has worked on this year as well as contact information for your representatives. Please feel free to contact us if you have any questions, concerns or feedback for how USG can better serve you.

Purpose and Methodology

The data in the following report is intended to provide useful information about the demographic breakdown of the Undergraduate Student Government at The Ohio State University. This is done through surveying and evaluating the anonymous and self-reported demographic information from USG members.

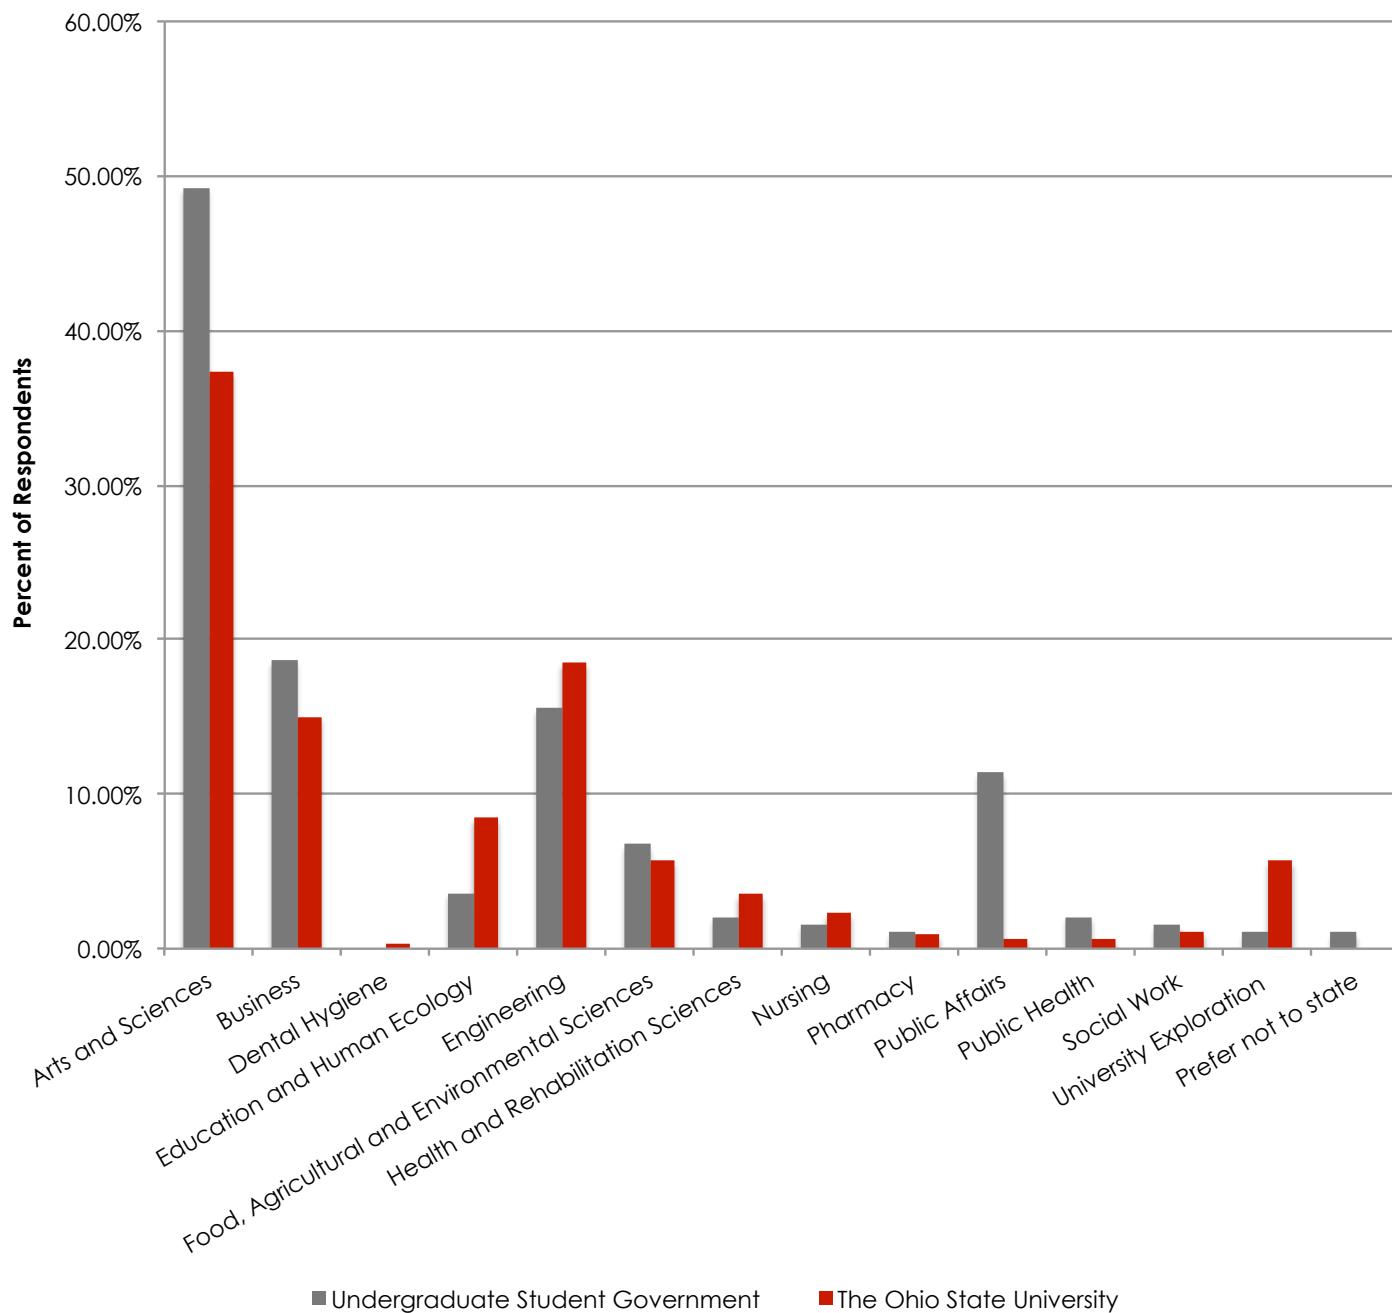

The Undergraduate Student Government Demographics Report survey was administered through an online survey that ran from January 18th through February 11th. The survey was sent only to undergraduate students on the USG roster maintained by the Internal Affairs Committee. USG is composed of 202 undergraduate students. The survey yielded 192 responses, or approximately a 95.05% response rate.

Summary of Data

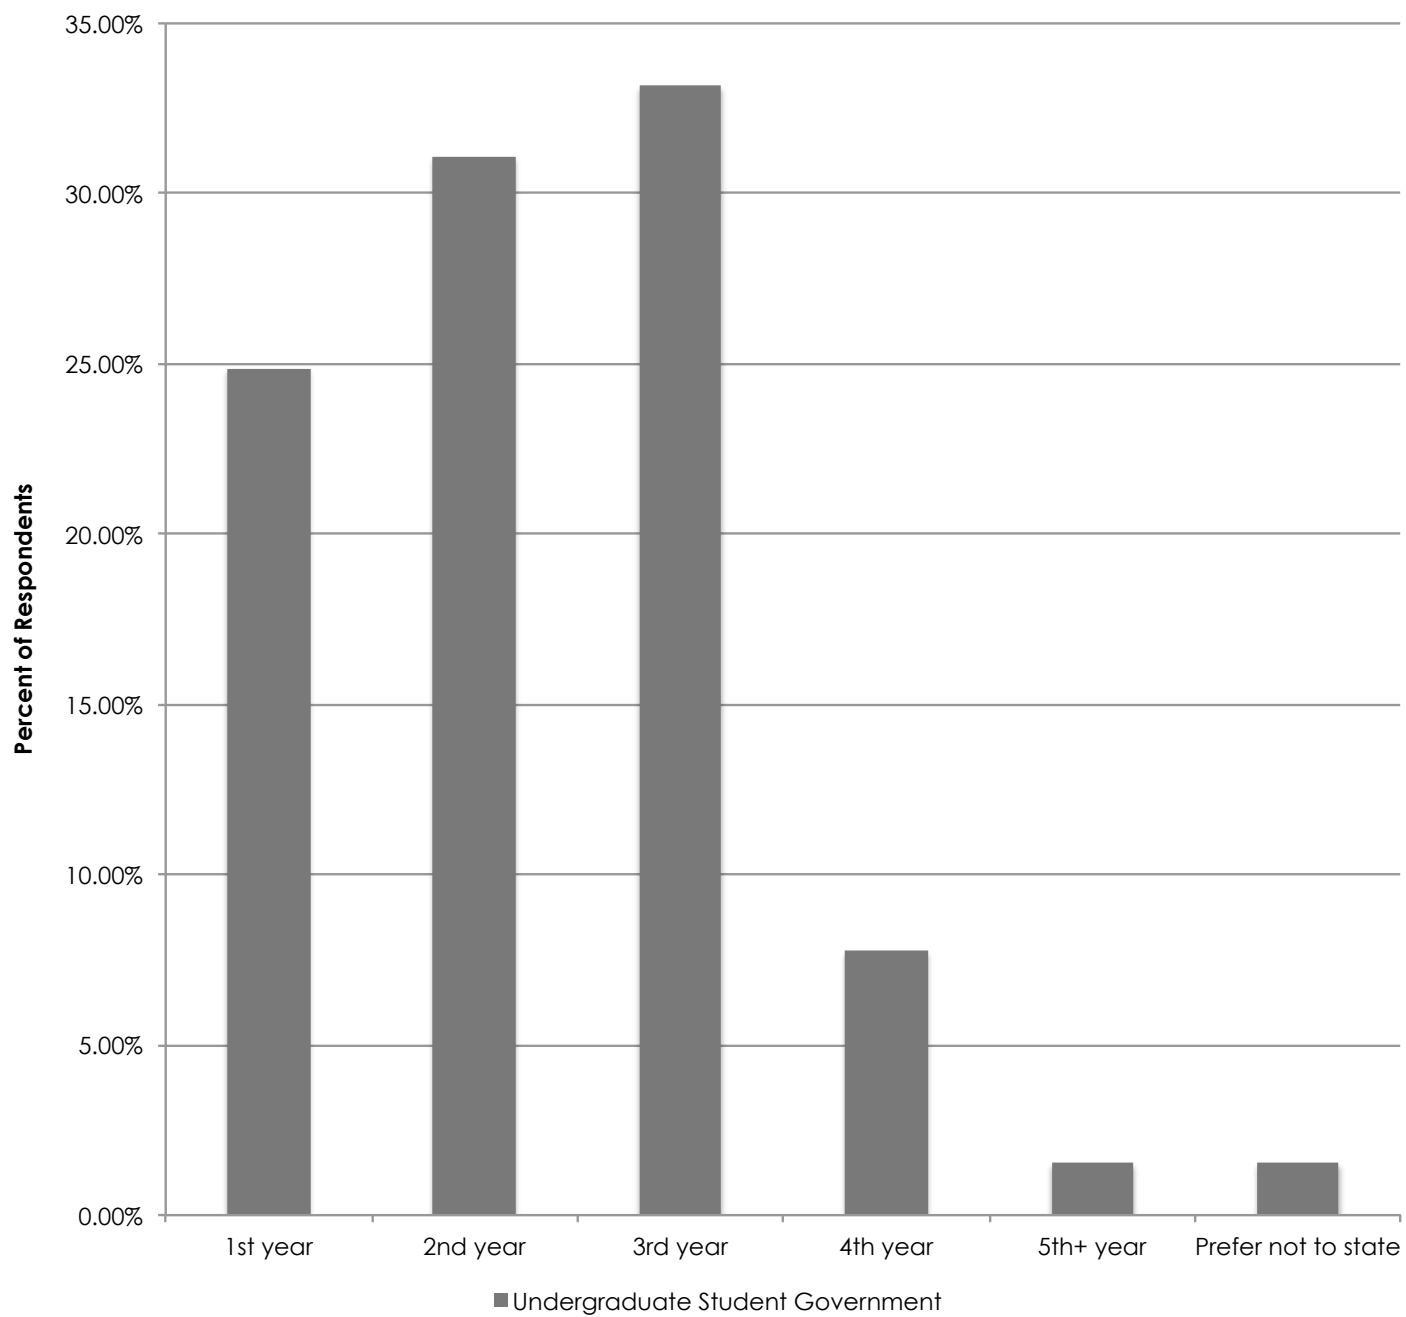

For each question asked in the survey, a graph has been presented showing the percent of respondents who chose each answer for the question presented. These values are represented by the bars in gray. When available, comparison statistics are provided from The Ohio State University's Fifteenth Day Enrollment Report, unless otherwise noted.¹ These values are represented by the bars in scarlet.
