

GA Member: Bryan Jagoe

Constituency: College of Dentistry

Constituency Report 1 49th General Assembly

So far, as a senator I have reached out to try and meet as many people in my constituency as I can. This task is more difficult than it sounds because technically there are not more than 100 undergraduate students enrolled in the College of Dentistry. This is due to the fact that there is only one area of study within the undergraduate studies area in the school- that subject being Dental Hygiene. However, the majority of my constituents are Biology majors, or other sciences that hope to someday be in the College of Dentistry. These are the same types of students as I am. So far, I have met a good amount of students that have come up to me telling me they were pre-dent. I reassured them to come to me with any questions they may have about the organization of USG and I explained to them my role within the General Assembly emphasizing how I represent their voices.

Meetings and Events Attended/Hosted
