Constituency: North Campus

## Constituency Report 1 49th General Assembly

I am a first year senator and I am excited to write a lot of resolutions that can help make some great changes. I am Currently doing research in academic affairs and legislation that can be brought to the floor. There are a lot of things that need to be addressed in Academic Affairs and a lot of great work can be done. I have voted to pass the resolution suggesting that high achieving students should be able to take 21 credit hours with no additional fees as well as all of the other resolutions brought to the General Assembly. I have been interacting with various people on north campus to see what people want improved on north campus. I am planning on hosting an event where my constituents can come to my event and talk about whatever they want to change or improve.
