Constituency: College of Engineering

## Constituency Report 1 49th General Assembly

So far as a senator I have attended every GA session and have voted in favor of all resolutions that have come to the floor considering they all clearly benefit this University in some helpful way to the students. In addition to this I've been brainstorming some policy points that I would like to cover on my own pertaining to the college of engineering that I will address once my schedule eases up a little bit.

### Meetings and Events Attended/Hosted
