Constituency: North Campus

## Constituency Report 1 49th General Assembly

I am a second year at The Ohio State University and a first year Senator. I look forward in continuing to meet with constituents on north campus and expanding my ideas on what positive change can occur at our university and more specifically on North Campus. In our General Assembly I am apart of our Academic Affairs committee. There is plenty of opportunity that myself and other senators can take advantage of when trying to make a change. I am eager to vote of more legislation that will help the student body as well as create and sponsor legislation that will have an impact on the university for the better. In this upcoming semester I will be holding an event on North Campus to hear more from residents on North Campus for improvements that can be made.
